ACCOUNTABILITY BUDDIES: THE KEY TO GETTING SH*T DONE

- 2 I'll be honest, I am a self-confessed addict for getting shit done.
- 3 There is something so rewarding about making a list and ticking off each item. It's like a little high-five every
- 4 time you cross another task off the task list. The only thing that stands in my way of achieving my goals is me.
- 5 I am the biggest achiever of making the list and getting through the first few items but then the wheels come
- 6 off and I end up losing momentum.
- 7 I remember spending an afternoon stuck in this never-ending loop. I had made a list of things that needed
- 8 completing and I just sat there, procrastinating about what to do first. The time slipped by and suddenly my
- 9 window to achieving it all was diminishing by the second. I thought to myself, "I need someone to motivate
- me," and that's where the need for an 'Accountability Buddy' came in.
- 11 Motivation is a hard thing to have all the time, especially when you're just too tired. Ultimately, we all need
- to be accountable for ourselves but having a little extra help never goes astray. What if all you needed to get
- up the hill was a little push?
- 14 Having a few people within your social and professional network to check in on you is an easy tool to finding
- 15 success. A simple transaction of accountability shared between two or more people is often what we, as
- humans, need in order to get it done. It's for the same reason that I enjoy group fitness classes. I'm far less
- 17 likely to give up with others watching me.
- 18 So here are some tips to finding and keeping your accountability buddy.
- 19 Tell me what you want, what you really really want...
- 20 A zig-a-zig ah? You need to know what you want before expecting to receive it. The same thing goes for when
- 21 you need an accountability buddy. Before you start, you need to ask yourself two questions: "What type of
- 22 motivation are you looking for?", and "What do you need to get done?" Pick three main goals of things you
- 23 want to achieve and get specific. Maybe you pick a general goal of improving your overall wellbeing and
- 24 fitness and break that down into three specifics of: increase exercise to four times a week, change your diet
- 25 to include more nutrients, and cut down your body fat percentage by 3-5%. Whatever you're choosing,
- 26 knowing what you want is the key to success. From there you need to decide what kind of support is going
- 27 to best serve you. Be warned, it might not be the type of support that you like the most, but this is about
- 28 what is going to get results.

Find your needle in the haystack

Now that you know what you want, you need to go in search of the holy grail: someone who can deliver. You need an all-encompassing, magical, motivated human who understands what you need to achieve and how to deliver motivation in a way that works for you. If you need some tough love, then they must be able to deliver that in a way that doesn't make you want to punch them. They have to be willing to motivate you and keep you on track. Actually, it works far better if your accountability buddy also needs *your* support. Unless you both require accountability, it can become a bit of a one-sided affair. If you're in this together, it's great to be able to share the support as this builds a solid foundation. The last thing you want is to take, take, take and leave the other person feeling emotionally drained. This way, you both get something worthwhile out of it.

This is the beginning of a speech given by Australian Prime Minister Scott Morrison to the National Press Club during the health and economic crisis caused by Covid -19. Morrison leads the Liberal National Party (LNP) Government. Politicians use an address to the National Press Club to raise their public profiles and announce and advocate for their plans and policies. Morrison reads the speech from autocues set up on either side of his lectern.
