

Chapter 10 Refer to pp 427-452 to help you answer the questions

Summary sheet 1

- Define all keys terms located on this page
 - Biodiversity
 - Ecosystem
 - Glacier
 - Globalisation
 - Greenhouse gasses
 - Statelessness

Summary sheet 2

- What is climate change?

Summary sheet 3

- Identify the direct effects of rising seas levels
- Identify some examples of the direct impact on health and wellbeing

Summary sheet 4

- Identify the direct effects of changing weather patterns/extreme weather patterns
- Identify some examples of the direct impact on health and wellbeing

Summary sheet 5

- What is mass migration?
- Why would conflict be defined/describes as a global trend?

Summary sheet 6

- Identify the direct effects of conflict
- Identify some examples of the direct impact on health and wellbeing

Summary sheet 7

- Identify the direct effects of mass migration
- Identify some examples of the direct impact on health and wellbeing

Summary sheet 8

- What are five benefits of tourism
- What are two challenges of tourism

Summary sheet 9

- What is world trade?
- Identify the direct effects of world trade
- Identify some examples of the direct impact on health and wellbeing

Summary sheet 10

- Identify the direct effects of tourism
- Identify some examples of the direct impact on health and wellbeing

Summary sheet 11

- Positive and negative implications of tourism

Summary sheet 12

- Identify the direct effects of digital technologies
- Identify some examples of the direct impact on health and wellbeing

DEFINE

①

Biodiversity:

Ecosystem:

Glacier:

Globalisation:

Greenhouse gases:

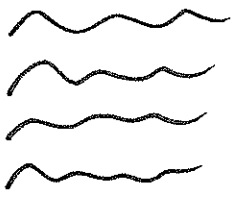

Statelessness:

A situation where a person does not have citizenship of any country. These individuals have no protection of their human rights (social + political) and cannot access education or healthcare or have freedom of movement.

What is Climate Change?

②

(Rising sea levels + changing weather patterns)

RISING SEA-LEVELS
